

**Material:** SECC

**Color:** N/A

**Form:** Sheet

| Physical Properties        | Metric                                     | Comment |
|----------------------------|--|---------|
| Density                    | --- g/cc                                   | NA      |
| Tensile Strength, Ultimate | 270 MPa                                    | NA      |
| Tensile Strength, Yield    | --- MPa                                    | NA      |
| Elongation at Break        | 34-39 %                                    | NA      |
| Elasticity Modulus         | 200 GPa                                    | NA      |
| Shear Modulus              | --- kJ/m <sup>2</sup>                      | NA      |
| CTE, Linear                | --- $\mu\text{m}/\text{m}^{\circ}\text{C}$ | NA      |
